About Fischer

FISHERPLASTICSISPROUDTOBE100%AUSTRALIAN OWNED & MADE.

Proudly Australian. Family Owned. Manufacturing Since 1965.

Fischer Plastic Products is a 100% family-owned Australian company with a proud manufacturing heritage spanning more than five decades. From our Head Office and manufacturing facility in Mulgrave, Victoria, we design, tool and manufacture our range of industrial plastic storage solutions right here in Australia.

Our story began in the mid-1960s, when our founder the late John Fischer established a modern tool shop specialising in plastic injection moulding and die-cast moulding dies. In 1974, Fischer took an important step forward, purchasing its first injection moulding machine and producing its first plastic storage solution product.

Since then, Fischer Plastic Products has grown to become one of Australia's most established and progressive manufacturers of small industrial plastic storage solutions.

From Concept to Creation All Under One Roof

What sets Fischer apart is our ability to take a product from design concept through to finished product entirely in-house. Our products are designed, tooled and manufactured at our Mulgrave facility, giving us greater control over quality, consistency and availability.

We use high-quality virgin materials and manufacture products designed for durability, reliability and long-term use across industrial, commercial, healthcare, warehousing, workshop, retail and organisational applications. As an Australian Made Certified manufacturer, we're proud to support local manufacturing while maintaining transparency and control throughout our production process.

Today, Fischer products are available through major retail, industrial and hardware stockists across Australia and New Zealand.

For generations of customers, the Fischer name has been synonymous with quality, reliability and service values that remain at the heart of everything we manufacture.

Fischer Plastic Products Designed, Tooled & Made in Australia.

A Message from our Managing Director

For more than 60 years, Fischer Plastic Products has been built on a simple commitment to manufacture quality products, provide dependable service and support our customers with practical storage solutions made right here in Australia.

As a 100% family-owned Australian company, we are incredibly proud of our history. From the foundations established by the late Mr. John Fischer in the 1960s, through to the purchase of our first injection moulding machine in 1974, Fischer has continued to grow, innovate and invest in Australian manufacturing.

Today, from our new facilities in Mulgrave, Victoria, we continue to design, tool and manufacture our products in our own manufacturing plants. This gives us control over the entire process, from the initial idea through to the finished product, and allows us to maintain the quality and reliability our customers have come to expect from the Fischer name.

While much has changed over the decades, our values have remained the same. We believe in quality, service, strong relationships and supporting Australian manufacturing.

I would like to personally thank our customers, distributors, suppliers and team members who have supported Fischer throughout our journey. Your trust and loyalty have helped make Fischer what it is today.

As we look to the future, we remain committed to developing practical, innovative and durable storage solutions while continuing the proud Australian manufacturing tradition that has defined Fischer for generations.

Thank you for choosing Fischer.
